

NS-888 彈匣式自動脈衝集塵機

CARTRIDGE DUST COLLECTOR

防爆型集塵機

鎂、鋁合金皆可用

可24小時使用

NS-888 彈匣式自動脈衝集塵機

馬力 HP	輸出公率 kw	電壓 (可選配)	入口口徑 inch (可選配)	靜壓 mmAq	材績 (長*寬*高) cm	風量 (m ³ /min)	音量 db	容量L (可選配)	主機重量 KG

- 本公司為專業製造不銹鋼集塵機等相關製品，每樣產品皆申請專利。
- 貴公司若有相關問題(如另設計馬力更高的集塵機、風量、靜壓、集料方式、集塵罩、入口口徑、儲塵容量等)，歡迎來電洽詢，本公司可配合變更或提出更好解決方式。

■ 特點

- **防爆集塵機**，針對鎂合金、鋁合金等容易粉塵爆炸物質，可另設計
- 如果要改成不鏽鋼材質，可另外設計。
- 風量大，靜壓高。靜音。品質不輸進口。
- **石墨、纖維、食品、碳粉、鋁粉、農藥、藥品等任何粉末**，有無毒性皆可使用。乾溼兩用。鐵屑或銅屑等金屬也可當回收桶，耐用好清理。
- 濾心採用PET材質，可過濾細小粉末到**0.1μm (micron)**，過濾面積大，確保工作環境不受汙染，可乾濕兩用，安裝替換容易。
- **附消音箱裝置**，減少噪音污染。
- 附壓力表，有無阻塞一目了然。
- 集塵機內部自動產生篩選氣流效應，石墨粉或纖維等物質會依照離心力原理直接掉入集塵桶，避免濾心受到異物碰撞，延長濾心之使用壽命。
- 只需將扣環拉起，下桶移出，即可清理粉塵。(下桶附移動輪，移動使用方便)。
- 馬力15 HP以上大小規格皆有，可視情況需求來搭配。
- 佔地空間小。
- 可另附手動吸塵裝置。
- 鼓風機純屬抽風效用，吸入物質沒有直接接觸馬達，馬達耐用持久。儲塵桶可做垃圾袋收集方式。
- **可24小時使用。負壓式設計，不會塵爆。**
- 高壓脈衝噴射自動清理濾心中間粉塵，粉塵自動振落，可全天候使用。

■ Features

- Explosion-proof dust collector, for magnesium alloy, aluminum alloy and other easily dust-explosive substances. It can be designed separately.
- If you want to change it to stainless steel, can design it in addition.
- Large air volume and high static pressure. Mute. Quality assured.
- Graphite, fiber, food, carbon powder, aluminum powder, pesticides, medicines and other powders, It can be used with or without toxicity. Both wet and dry. Metals such as iron filings or copper filings can also be used as recycling bins, which are durable and easy to clean.
- The filter element is made of PET material, which can filter fine powder to 0.1μm (micron). The filter area is large to ensure that the working environment is not polluted. It can be used for both dry and wet purposes, and is easy to install and replace.
- It is equipped with a sound box device to reduce noise pollution.
- With pressure gauge, you can see if there is any blockage at a glance.
- The filter airflow effect is automatically generated inside the dust collector. The graphite powder or fiber and other substances will fall directly into the dust bucket according to the principle of centrifugal force to prevent the filter element from colliding with foreign objects and prolong the service life of the filter element.
- Simply pull up the buckle and remove the lower bucket to clean up the dust. (The lower bucket is equipped with a movable wheel, which is easy to move and use).
- There are all sizes and specifications with horsepower above 15 HP, and can be matched according to the needs of the situation.
- Occupies a small space.
- A manual vacuum device can be attached.
- The blower is purely for air extraction, the inhaled substance does not directly contact the motor, and the motor is durable and long-lasting. The dust storage bin can be used as a garbage bag collection method.
- It can be used for 24 hours. Negative pressure design, no dust explosion.
- The high-pressure pulse jet automatically cleans the dust in the middle of the filter, and the dust is automatically shaken off, which can be used all-weather.
